

Specification Of Machine

- ✓ Exclusively developed software,easy to use. Free upgrade all life.
- ✓ High precision, high speed, high efficiency
- ✓ Max cutting height 160mm
- ✓ Work with air compressor.
- ✓ Double-Blade alternate bending system, also friendly to mini-size letter.
- ✓ Planer cutter tool made in Korea, good quality, very durable and recycable
- ✓ Automatic feeding device with length-tracking feedback system, to ensure actual feeding accuracy to $\pm 0.1\text{mm}$.

Model	NAB-6S-C	Slot Depth	Auto-set in software
Feeding System	Double-motor Rolling-typed continuous feeding system	Min bending radius	$\leq 5\text{mm}$
Slotting System	Planer cutter tool made in Korea	Precision	$\pm 0.1\text{MM}$
Bending System	Double-Blade alternate bending	File Format	AI, DXF
Software	Self-developed Operate Software	Voltage	220V
Processing Material	Stainless, Iron, Flat aluminum etc	Motors	2 Sevo motors + 2 Stepper motors
Material thickness	0.5-1.2mm	Power	3000W
Max Material Height	160mm	Air compressor	0.6-0.8kgf/m ²
Speed	5 Meters/Minute	Machine Size	2070 x 770 x 1540mm
Working Principle	Auto feed, Auto Slot(Cut), Auto Bend	Machine Weight	320kg
Slot Degree	no limit (0-180) for flat tapes	Packing Weight	380kg
