

### Specification Of Machine

- ✓ All-in-one full cutting / half cutting / creasing / plotting functions.
- ✓ Optional vibration cutting for materials  $\leq 6\text{mm}$  (KT board, PVC, corrugated, gray board, etc.).
- ✓ With CCD auto-alignment system for precise printed image cutting.
- ✓ Scan QR code to read cutting path, enabling mixed cutting of various printed materials.

### Industry Application

White Card

Adhesive Sticker

PVC

Colorful Card

| Model                  | NAB-604                                                                              | NAB-0906       | NAB-1209       |
|------------------------|--------------------------------------------------------------------------------------|----------------|----------------|
| Effective cutting area | 600*400MM                                                                            | 900*600MM      | 1200*900MM     |
| Total machine power    | 4000W                                                                                | 4500W          | 5000W          |
| Overall dimensions     | 1960*695*1130                                                                        | 2260*1165*1130 | 2560*1465*1130 |
| Cutting speed          | $\leq 1500 \text{ MM/S}$ (CUTTING ACCORDING TO DIFFERENT MATERIALS)                  |                |                |
| Cutting thickness      | $\leq 6\text{MM}$                                                                    |                |                |
| Standard configuration | LASER GUIDE, PRESSURE ROLLER TOOL, DRAG KNIFE TOOL, LARGE/SMALL FORMAT PLOTTER BLADE |                |                |

|                       |                                                                                            |
|-----------------------|--------------------------------------------------------------------------------------------|
| Optional tools        | Vibrating knife tool, dotted line pressure roller, double-sided slotting cutter head, etc. |
| Fixation method       | Vacuum adsorption                                                                          |
| Transmission port     | Standard network port                                                                      |
| Buffer capacity       | 2G, one-time quick transmission with page-turning cutting function                         |
| Compatible formats    | PLT, DXF, AI, PDF, NC, etc.                                                                |
| Working voltage/Power | AC/220V $\pm 10\%$ 50HZ                                                                    |
