

LED Neon Flexible strip light:

LED Neon Flex is a product of high flexibility and decorative use. Resistant to contact with water. Perfect suited for advertising or landscape architecture.

Technical Specification	
Led package size	2835 SMD
Nominal Voltage	DC-12V
Power	8W_10W/Meter
IP Rating	IP65 (water proof)
Size	6*12 SQmm
	8*16 SQmm
Length	5M/roll
Cutting section	25mm
LED quantity	120 LED/m
Beam angle	120 degree
Life time	30,000hrs
Warranty	1 year
Certification	CE and RoHS compliant

Light parameters (6x12mm - 8x16mm)	
Color	Color temp. (kalvin)
Cool white	22000k
White	11000k
Natural white	4000k
Warm white	3000k
red	-
Ice blue	-

Lemon yellow	-
Purple	-

Feature:

- Up to 15 times longer life compared to incandescent light sources.
- No harmful UV/IR Radiation
- Ultra efficient LED light source, saves up to 80% energy vs. incandescent with similar light output.

Notice:

Due to extensibility of external elastic material of Neon Flex, please be aware it may be needed to adjust the length of product to actual installation area dimensions. It is natural feature of Neon Flex, it does not affect the quality of the product nor light characteristics of LED tape inside. Example: a 5m roll of Neon Flex may turn out to be about 2 cm longer. In such scenario, please unbend the product so it could return to desired length.
