

فوم

1000 1000MM - 10mm thickness

فوم

1000 1000MM - 10mm thickness

فوم

1000 1000MM - 10mm thickness

Features:

Lightweight and durable, easy to handle and install. Ideal for indoor and outdoor use.

Other features:

Good weather resistance, UV resistant, fire retardant, and easy to clean.

High strength and impact resistance, suitable for various applications.

Good dimensional stability, no warping or shrinking.

Easy to cut and shape, suitable for custom applications.

Good electrical insulation properties, suitable for electrical applications.

Good chemical resistance, suitable for chemical applications.

Good mechanical properties, suitable for structural applications.

Good thermal stability, suitable for high-temperature applications.

Other features:

Table:

Material	Thickness	Weight	Strength
Foam	10mm	0.025kg/m²	10N/m²
	20mm	0.05kg/m²	20N/m²
	30mm	0.075kg/m²	30N/m²
	40mm	0.1kg/m²	40N/m²
Corrugated	10mm	0.025kg/m²	10N/m²
Other	10mm	0.025kg/m²	10N/m²

Comparison:

Comparison of PVC foam and other materials. PVC foam is lightweight, durable, and easy to handle. It is suitable for various applications, including indoor and outdoor use.

Other materials, such as wood and metal, are heavier and more expensive. They are also more difficult to handle and install. PVC foam is a better choice for most applications.

Technical Specifications:

Material: PVC foam

Using:

1. Measure

2. Cut

3. Assemble

4. Finish

5. Install

الاستخدام:

1. القياس

2. القص

3. التجميع

4. الانتهاء

5. التركيب
